ABSTRACT

The Tourist guide project is based to expand tourism roots and help ease problem faced by visitors and tourists. The project is built to provide feasible and easy to use website which can reduce the pain to find outing places. The website facilitates the movement of tourists from one place to another without chaos. For travel lovers its a one stop destination, since it saves time, provides variety of options and is profoundly efficient.

PROJECT DESCRIPTION

1. **Season Choice:** User should enter the required season.
2. **Best Locations:** Best locations suitable for the selected season will be displayed.
3. **Virtual Experience:** Experience location before hand to feel the best.
4. **Brief:** Displaying a brief information about the location.
5. **Ratings:** User may provide their reviews.

IDEA

In the webpage, option to enter user's **season choice** will be displayed. User should enter season(summer, winter, monsoon). According the entered season choice, best locations list will be displayed along with **Virtual Experience** provided. Briefing on the location (budget plan and travelling distance) will also be provided. Ratings and reviews can be provided by the user.

Thank You....
